CONTENT

The course is structured in two parts. The first part will cover topics around international political economy, with a focus on four issues: international organizations, finance, investment, and trade. Session 1 examines why states join international organizations and what these institutions can or cannot accomplish. Sessions 2 and 3 focus on international monetary and financial relations, including discussions about sovereign debt (session 2) as well as central bank independence and monetary integration (session 3).

Session 4 combines financial relations to international investment, looking at capital mobility both in terms of portfolio investment (equity, securities, debt) and in terms of foreign direct investment. Session 5 zooms in on foreign direct investment, including a discussion of how bilateral investment treaties help mitigate political risk. Finally, session 6 examines international trade, with a focus on who supports protectionism, and when. Along the way, we will identify the welfare effects and distributional consequences of foreign economic policy decisions. We will use the tools of political science to analyze how interest groups, voters, bureaucrats, policymakers, ideas, and power politics interact to shape policy outcomes.

The second part of the course covers conflict and violence. The first two sessions deal with the core of IR conflict, inter-state war. Since wars are less frequent these days, the big puzzle is the decline of war in the international order. First, we discuss in session 7 the democratic and capitalist peace theories and then, in session 8, historical arguments are introduced.

Sessions 9 and 10 address the most prevalent form of conflict today, civil war. Session 9 discusses the different types of civil wars, and the political dynamics that they set into

motion, while session 10 introduces the literature on the causes of civil war and the methodological problems to identify them.

Finally, sessions 11 and 12 tackle terrorism. Session 11 is about the nature of terrorism and terrorist groups. Session 12 is, in a sense, less academic and more oriented to current affairs, reviewing what we know about Jihadist insurgency, with an emphasis on Al Qaeda and ISIS.

READINGS

The readings are mandatory, except those marked as “recommended” or (in the IPE sessions) as “presentations.” The key for the success of the course is that you do the readings in advance. You can find all the reading materials in Aula Global.

REQUIREMENTS

You have to write a research paper (80% of the final grade). You can choose to do the paper either in international political economy or conflict. Depending on the choice, the paper will be evaluated by the instructor teaching on that area. The remaining 20% of the grade corresponds to class participation and class presentations.

In addition to the core and recommended readings, sessions 2 to 6 each include 4 papers that illustrate the IPE topics discussed on that week (see “Presentations” below). At the beginning of the semester, you will sign up to present a paper of your interest. In the corresponding session, you will give a 5–10-minute presentation to your colleagues, connecting the paper you read to the main discussion.
