## Course Description

This course aims at introducing students to the main questions, debates, and contributions in the field of political economy, broadly understood as the study of the effects of social, political and institutional variables on economic outcomes.

## Structure of the Class

Each session will consist of a presentation of the topic by the professor, an introduction to some required readings by one or more students, and an open discussion with the rest of the class. See course requirements below

## Requirements and Evaluation

Students are expected to attend all seminars, read all the required readings for each week before each meeting, and participate actively in class. Students will also have to introduce some of the required readings at least once in the course, setting up the discussion of the texts, and write a research paper at the end of the course on a topic related to the course and previously agreed with the professor (the deadline for its submission will be announced in class). In the last meeting of the course, each student will present an outline of their research paper, to be openly discussed by the rest of the class

### Evaluation

- Research paper (60%)
- Discussion points (20%) .- To be submitted Mondays at midday (12pm).
- Presentation of a reading in class (10%)

- Participation in class discussions (10%)

## Outline

The outline is subject to change. Each week I will indicate any specific change in the readings.
